Cura Terrae is a leading environmental services group dedicated to advancing sustainable practices across a diverse range of sectors. With a team of around 350 currently operating from 14 sites (and growing), the group delivers a broad range of environmental solutions built around **four core service pillars:**

Land & Nature

Water

Air

Management & Compliance

A leading multi-disciplinary environmental services and consultancy provider

Your goal is our goal

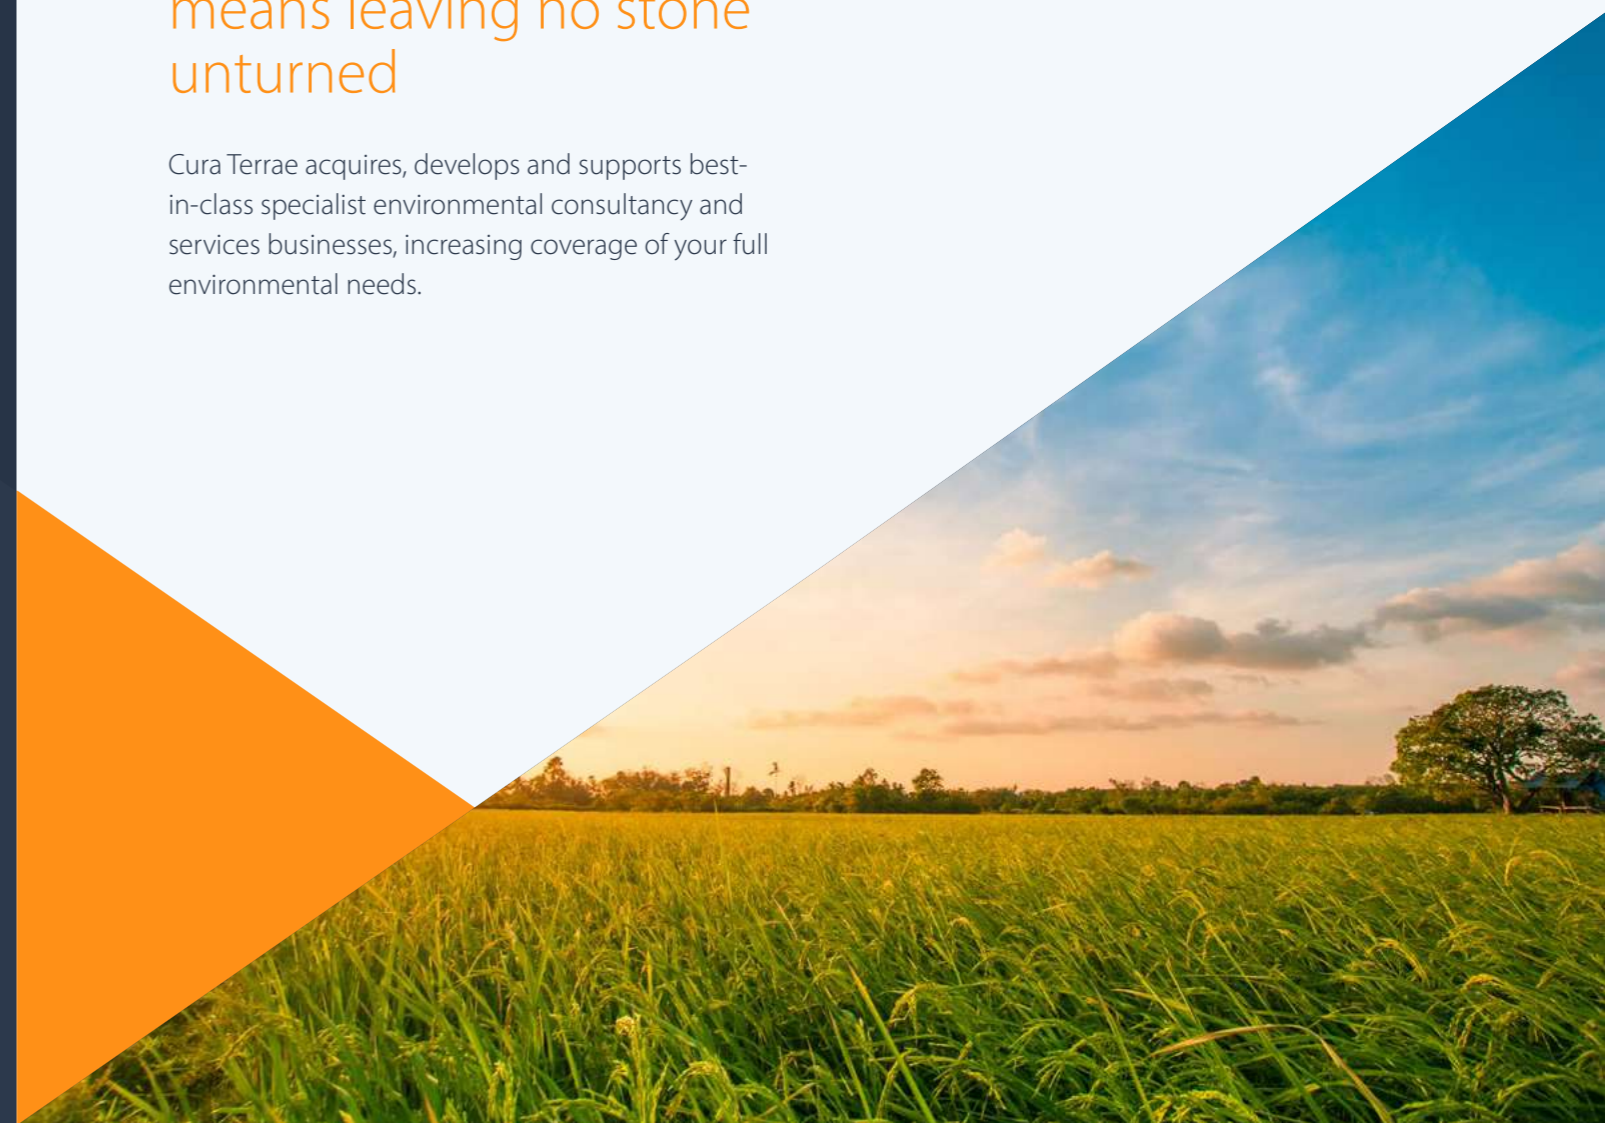

We know that businesses want to help solve the environment crisis, so our dedicated team of technical experts will go above and beyond to provide the highest quality services and help you accomplish your environmental goals.

A sustainable future

In order to achieve real and long-term sustainability, we are committed to the environment, to having a positive societal impact, and to robust governance.

Taking care of the Earth means leaving no stone unturned

Cura Terrae acquires, develops and supports best-in-class specialist environmental consultancy and services businesses, increasing coverage of your full environmental needs.

These are the services we provide to help you take care of the Earth

Land & Nature

Arboriculture

Arboricultural Clerk of Works (ACoW)

Arboricultural impact assessment

Arboricultural surveys

Tree protection plan

Archaeology & Heritage

Archaeological desk-based assessment

Archaeological monitoring (watching brief)

Environmental processing and assessment

Finds processing and assessment

Geophysical surveys

Heritage statement / impact assessment

Heritage/ conservation management plans

Historic building record

Historic building survey

Historic environment due diligence appraisal

Historic landscape surveys

Monuments and earthworks surveys

Photographic survey

Post-excavation services

Project design / written scheme of investigation

Strip, map and record excavation

Trial trench evaluation

BNG

BNG baseline survey

BNG and habitat creation

BNG design stage report

BNG feasibility report

BNG landscape proposals and habitat enhancement plans

Strategic BNG advice

Ecology

Ecological Clerk of Works (ECoW)

Ecological Impact Assessment (EclA)

Habitats Regulations Assessment (HRA): Stage 2 and 3

Habitats regulations screening assessment

Invasive Non-Native Species (INNS) survey

Named ecologist role

NVC Survey

Preliminary Ecological Appraisal (PEA)

Protected species licence applications

Protected species mitigation design

Protected species monitoring

Protected species surveys

Protected species translocations

UK Habitat Classification surveys

Environmental Assessment & Consenting

Construction Environmental Management Plan (CEMP)

Decommissioning Environmental Management Plan (DEMP)

EIA and environmental statement

EIA scoping

EIA screening

Environmental and planning constraints mapping

Environmental Clerk of Works (EnvCoW)

Environmental audits

Expert witness

Multi-disciplinary environmental options appraisal

Planning, design and access statement

Secondary consents applications

Site audit reports

Stakeholder / public / community consultation

Habitats

Badger sett closure / artificial sett creation

Badger sett management and monitoring

Habitat box installation

Habitat creation / enhancement / restoration

Habitat Management and Monitoring Plan (HMMP)

Habitat monitoring/management/maintenance

Habitat restoration

Invasive species management

Landscape Architecture

Hard and soft landscape and environmental design

Landscape and Visual Impact Assessment (LVIA)

Landscape Character Assessment (LCA)

Landscape contract administration

Landscape design concept, strategy and masterplan

Landscape management plan / landscape and ecological management plan

Landscape survey / appraisal

Landscape tendering

Air

Ambient air quality: indicative monitoring systems

Ambient air quality: monitoring instrument rental

Ambient air quality: reference method MCERTS monitoring instruments and systems

Ambient air quality: service contracts, planned maintenance and callouts

Atmospheric emissions and air quality monitoring

Bioaerosol monitoring

BS EN 14181 QAL2 / AST calibration of CEMS

CEMS service and support

Continuous Emission Monitoring Systems (CEMS) - gases and dust

Dust monitoring services

Environmental Data Acquisition System (eDAS 4.0)

Greenhouse gas monitoring instrumentation

Hire and purchase of air monitoring equipment

Indoor air quality testing

Instruments for environmental and climate change scientific research

Leak Detection and Repair (LDAR)

MCERTS accredited stack emissions testing

MCERTS multi-gas CEMS systems (cross-duct, fastloop, hot-wet extractive)

MCERTS temporary CEMS installation

Medium Combustion Plant Directive (MCPD) stack testing

Meteorological stations and sensors

Odour monitoring

Process flow measurement

Workplace air monitoring

Water

CENTAUR® - storm overflow optimisation

Environmental Data Acquisition System (eDAS 4.0)

Flow and load surveys

Flow surveys

Flow verification

Hire and sale of water monitoring equipment

Innovation

Smart wastewater solutions

Storm data capture (Storm Catcher™)

Strategic consultancy support for the water industry

Water quality monitoring

Trade effluent monitoring systems and services

Wastewater-based epidemiology

Management & Compliance

Environmental Management

Carbon net zero support

Construction Environmental Management Plans (CEMP)

Ecological Impact Assessment (EclA)

EIA and environmental statement

Environmental audits and inspections

Environmental Clerk of Works (EnvCoW)

Environmental Due Diligence (EDD)

Environmental Impact Assessment (EIA)

Environmental legal compliance support service

Environmental Management Systems (EMS) /ISO 14001

Environmental permits and consents

Environmental planning and consenting

Habitat Management and Monitoring Plan (HMMP)

Habitat monitoring/management/maintenance

Innovation

Landscape contract administration

Landscape management plan / landscape and ecological management plan

MCPD environmental permits

Named ecologist role

Regulation 61 Best Available Technique (BAT) compliance assessment

Site audit reports

Strategic BNG advice

Waste and materials management (inc. CL:AIRE)

Occupational Hygiene

Breathing air line testing

COSHH risk assessments

Electromagnetic Field (EMF) assessments

Hand Arm Vibration (HAV) assessments

Indoor air quality testing

Legionella risk assessments

Lighting assessments

Local Exhaust Ventilation (LEV) testing

M9 bioaerosol monitoring

Whole Body Vibration (WBV) assessments

Workplace air monitoring

Workplace noise surveys

Land & Nature

Our **Land & Nature** services are delivered by specialists in ecology, the historic environment, environmental consenting, landscape architecture, habitat creation and restoration, and arboriculture. We provide comprehensive environmental consultancy services tailored to meet the unique needs of your project.

From feasibility studies and design development to obtaining permissions and supporting construction, our team offers expertise throughout every stage of the project lifecycle. By incorporating innovative approaches and sustainable solutions, we aim to protect ecosystems, enhance biodiversity, and support resilient infrastructure and community development.

Our Land & Nature team is experienced in working on diverse projects, including urban developments, renewable energy infrastructure, habitat restoration programs, conservation initiatives, and government-led schemes.

Services include:

- ▶ Archaeology & heritage
- ▶ Arboriculture
- ▶ Biodiversity Net Gain (BNG)
- ▶ Ecology
- ▶ Environmental Assessment and Consenting
- ▶ Habitat creation and restoration
- ▶ Landscape architecture

Air

Our **Air** services cover every aspect of air quality and emissions management, from ambient air monitoring to advanced MCERTS-accredited stack emissions testing and analysis. We provide tailored, cost-effective solutions to help clients meet regulatory requirements, support sustainable air quality strategies, and minimise their environmental impact.

With a team of industry experts and access to state-of-the-art technology, we ensure accurate data collection, precise analysis, and actionable insights. Whether it's assessing ambient air quality, supporting compliance with emissions standards, or implementing innovative monitoring systems, we deliver comprehensive services to industrial facilities, regulators, and organisations across a variety of sectors.

Our Air services are designed to address the growing need for reliable air quality data and compliance solutions. By using cutting-edge instrumentation and tools we help clients manage air quality challenges and implement long-term improvements.

Water

Our **Water** services are delivered by specialists in flow and water quality monitoring, wastewater, and environmental compliance. We provide comprehensive solutions tailored to support industrial clients, water companies, and tier 1 consultancies in meeting regulatory requirements and operational challenges.

From trade effluent monitoring and flow verification to catchment-scale investigations, we integrate innovative approaches and technologies to help clients improve efficiency, reduce environmental impacts, and ensure compliance with complex regulations.

Our Water team is experienced in working across diverse sectors, including food and drink, pharmaceuticals, heavy industry, highways, airports, and government-led infrastructure projects.

Our experts combine decades of experience with cutting-edge methodologies and governance, ensuring reliable, accurate data and actionable insights for clients. Whether supporting compliance, optimising wastewater systems, or conducting large-scale environmental surveys, we deliver solutions tailored to your needs.

Management & Compliance

Our **Management & Compliance** services provide a comprehensive range of solutions designed to support you in meeting regulatory obligations, enhancing workplace safety, and achieving your environmental and sustainability objectives. With ever-evolving regulations and growing expectations for environmental responsibility, we offer the expertise and guidance needed to navigate these challenges effectively.

From initial assessments to ongoing compliance monitoring, our multidisciplinary team delivers practical, actionable advice tailored to your unique needs. Whether addressing specific workplace safety requirements, ensuring adherence to environmental laws, or supporting strategic sustainability goals, we provide the tools and insights to help your organisation operate responsibly, efficiently, and sustainably.

Our holistic approach integrates compliance, safety, and environmental stewardship into your operations, empowering you to reduce risks, improve operational performance, and demonstrate your commitment to sustainable practices.

Our values

Excellence

We strive for excellence in understanding client needs and in delivery, underpinning this with excellence in knowledge and professionalism.

Trust & commitment

We are committed to our customers and staff, building trusted relationships upon which to build results.

Sustainability

We operate sustainably and help our customers to operate sustainably.

Safety & wellbeing

The safety and wellbeing of our staff is our foremost consideration.

Inclusion & teamwork

We value equality, diversity, and inclusion as we work with colleagues and customers for the best outcomes. Our inclusive teams and approach make us stronger.

“We have received an extremely professional service from Cura Terrae Land & Nature. Their extensive knowledge on ecological matters and willingness to help the project team has helped Network Rail in matters with Natural England. Cura Terrae’s ecologists have been instrumental in all our dealings with Natural England.”

Project Manager, **Network Rail**

“Thank you very much for all your assistance and advice and work over the past two days. It has been very productive for our site and laid the foundations for us to understand where we need to be and what we need to do, which until your visit was a field of cloudy mist. We look forward to your final report, and finding out how the Cura Terrae Environmental Management team can help us achieve our targets for environmental responsibilities”.

Health, Safety and Environment Manager, **PrepWorld**
